

noncopyable

boost::enable_shared
_from_this< plasm >

ecto::plasm

```
graph BT; A[ecto::plasm] --> B[noncopyable]; A --> C[boost::enable_shared_from_this< plasm >];
```

The diagram illustrates a relationship where the `ecto::plasm` class (represented by a grey box at the bottom) inherits from or is associated with two other classes. Two blue arrows originate from the top of the `ecto::plasm` box and point upwards to the `noncopyable` box (top left) and the `boost::enable_shared_from_this< plasm >` box (top right).
